

RATNA BLESSING: Successful overhaul after fire

THE CHALLENGE

SeaTec Communications has completed a complete overhaul of the vessel Ratna Blessing after it was extensively damaged by fire and had been laid up for more than 18 months. The fire had damaged the vessels bridge systems and these needed to be replaced or repaired.

THE SOLUTION

Engineers boarded the vessel and found non of the navigation and communication was in working order with most systems not even switching on. May antennas were shattered and most of the cables had been damaged as well.

The engineers worked tirelessly to complete the required repairs within the deadline set by the client. Through their continuous hard work and efficient arrangement of spares deliveries Seatec were able to meet the completion deadline for the client.

The vessel is no once again seaworthy and has returned to service thanks in no small part to the dedication and hard work of the team at SeaTec.
